Vysvetlivky k tabuľkám „ Prehľad KNL na cestách I. a II. triedy v SR v roku 2008“

Ukazovateľ: HHSNN

KNL - kritická nehodová lokalita je lokalita s evidentne vysokým počtom následkov pri dopravných nehodách. Nato, aby sa nehodová lokalita stala kritickou z hľadiska **následkov dopravných nehôd**, musí byť splnená podmienka, že skutočná hodnota hospodárskych strát z následkov dopravných nehôd je rovný alebo väčší ako vypočítaná kritická hodnota hospodárskych strát z následkov dopravných nehôd v priebehu jedného kalendárneho roka v sledovanej lokalite. Kritická hodnota hospodárskych strát z následkov dopravných nehôd sa určí exaktným postupom.

Opakujúce sa KNL - za opakujúcu sa kritickú nehodovú lokalitu sa považuje taká KNL, kde sa počas uplynulých aspoň 2 rokov sústavne vyskytoval v zozname kritických nehodových lokalít z hľadiska následkov dopravných nehôd.

Závažnosť DN:

- SDN - smrteľná dopravná nehoda pri ktorej došlo k smrteľnému zraneniu účastníka nehody,
- VDN - vážna dopravná nehoda pri ktorej bol smrteľne, alebo ťažko zranený aspoň jeden účastník dopravnej nehody,
- ODN - osobné dopravné nehody pri ktorej vznikne ujma na zdraví ľudí (dôjde k smrteľnému, ťažkému a ľahkému zraneniu).

Následky DN :

- SZ - smrteľne zranená osoba,
- ŤZ - ťažko zranená osoba,
- ĽZ - ľahko zranená osoba,
- MŠ - materiálna škoda v tis. Sk podľa odhadu polície.

Ukazovateľ HHSNN pre učenie KNL a pre klasifikáciu KNL:

- HHSNN - hustota hospodárskych strát z následkov DN (vyjadruje hospodárske straty v tis. Sk. z následkov DN na 1 km dĺžky cesty alebo diaľnice),
- SaP - správa a prevádzka ciest,
- SR - Slovensko,
- Opak. KNL *** - opakujúca sa KNL.
